

NATIONAL SECURITY AGENCY
FORT GEORGE G. MEADE, MARYLAND 20755-6000

July 2008

**Notification of MANDATORY Field Software Upgrade (FSU) to all TACLANE-Micro
KG-175D In-Line Network Encryptors (INEs).**

ATTN: TACLANE-Micro KG-175D Customers:

Release 3.3v3 is now the current certified software version for the TACLANE-Micro KG-175D INE. You are receiving this letter as notification that this release is an NSA mandated upgrade to be completed by 28 February 2009.

Release 3.3v3 incorporates several bug fixes, corrects a problem with certain Internet Protocol addresses and a problem with the static route table. This release will result in a longer, more useful product life and will allow customers to better maintain their TACLANE-Micro KG-175D INEs. This software upgrade to Release 3.3v3 is FREE for all TACLANE-Micro KG-175D INEs.

NOTE: The TACLANE-Micro KG-175D development is performed as a series of releases to provide increased capabilities and features to better suit the needs of our customers.

To ensure your TACLANE-Micro KG-175D INEs are upgraded to Release 3.3v3 and that your organization receives notification of future software releases, please **register all of your units** with GDC4S as soon as possible. Please send your Name, Organization, Telephone Number, TACLANE-Micro Kg-175D Serial Number(s), additional POC's via telephone or e-mail (e-mail is the preferred method) to the following address:

Registration, Upgrade Reporting or Questions:
GDC4S Help Desk Telephone: (877) 230-0236
Infosecsupport@gdc4s.com

Note: Prior to performing the FSU, contact your local cryptographic support office.
Note: The deadline to upgrade TACLANE-Micro KG-175D INEs to Release 3.3v3 is 28 February 2009.
