TACLANE®-Micro Encryptor Certified by the National Security Agency for HAIPE® IS v3.0.2 Compliance

Software release enables TACLANE-Micro users to have seamless foreign interoperability and dual network operating capability.

Product Name: TACLANE®-Micro (KG-175D)

Availability: Immediate to qualified customers

Web address: www.gdc4s.com/secureproducts

The TACLANE-Micro in-line encryptor has been certified by the National Security Agency (NSA) for High Assurance Internet Protocol Encryptor Interoperability Specification (HAIPE® IS) version 3.0.2. The software upgrade can be immediately implemented into existing TACLANE-Micro devices, to enhance overall encryptor interoperability, performance and functionality.

Operating enhancements include:

- Foreign Interoperability with Simultaneous Suite A/AES EFF
- AES EFF Only
- IPv4/IPv6 Dual Stack
- Remote zeroize
- Depac Module for: U.S., CCEB, NATO, NATO Nations, Coalition

Background:

The TACLANE-Micro is the most widely deployed HAIPE® IS and Crypto Modernization Compliant encryptor. Optimized for both tactical and strategic environments, the TACLANE-Micro is high speed, compact and mobile. The encryptor is interoperable with all HAIPE IS compliant TACLANE models and can be remotely managed by GEM X™ encryptor manager. The TACLANE-Micro is available as a new

unit or trade-in replacement for TACLANE-Mini, TACLANE-Classic, TACLANE-E100 or Sectéra® INE devices. The encryptor is supported 24/7 with Help Desk Support and comes with a 5 year warranty.
