

General Dynamics Tadpole® Announces Special Pricing for Portable, High-Performance Servers

Tadpole mobile servers provide a cost-effective solution for continuity of operations in UltraSPARC/Solaris-based environments

Product Name: Tadpole® VM2100 Server/Workstation and VR2100 Rack Mount Servers

Pricing: End of year discounts on VM2100 and VR2100 servers; valid through December 31, 2009

Web address: <http://www.gdc4s.com/Q4promo>

General Dynamics Tadpole is offering special pricing for two high-performance and cost-effective server solutions for military, government and commercial mobile networks currently using the Solaris operating system. The Tadpole VM2100 server/workstation and Tadpole VR2100 rack mount servers enable users to rapidly replace end-of-life equipment while increasing processing power and improving network operating efficiency in a housing that uses a fraction of the space occupied by previous server units.

Applications:

- Rapid deployment military or state and federal disaster recovery operations
- Law enforcement and emergency medical organizations
- Utility and other field service technicians

Configuration and Pricing:

Tadpole VM2100 Mobile Server/Workstation

- 2 x 1.6GHz UltraSPARC IIIi CPU's
- 1280 x 1024 LCD display
